MCGILL
PORTFOLIO

KZ-250 is a concept design of a Fixed Wing UAV. It is inspired by Medium-Altitude Long-Endurance (MALE) drones which are used for both military and industrial purposes.

MY PROCESS:

PRODUCT RESEARCH

CONCEPT AND SPECIFICATIONS

MASTER MODEL CURVES & SURFACE DESIGN (in NX)

IMPORT INTO NX ASSEMBLY FOR TOP-DOWN DESIGN

2D REPRESENTATION

IMPORTING CAD FOR STATIC ANALYSIS

COMPUTATIONAL FLUID DYNAMICS FLOW ANALYSIS

STATIC STRUCTURAL ANALYSIS OF FUSELAGE

IDEAS FOR IMPROVING UNDERSTANDING OF DESIGN

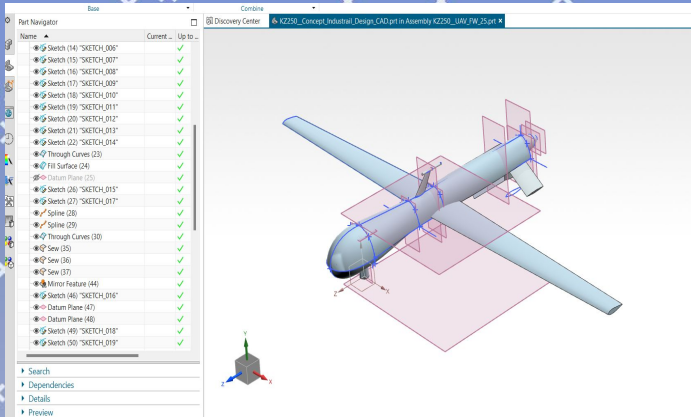

**3D SOLIDWORKS
SIMULATION**

KUZEY.WORKS

Concept Fixed UAV Design Specifications:

- Top speed: 220 km/h
- Wing Span: 14900 mm
- Length: 7070 mm
- Payload of 300 Kg
- Maximum Altitude: 9500 meters

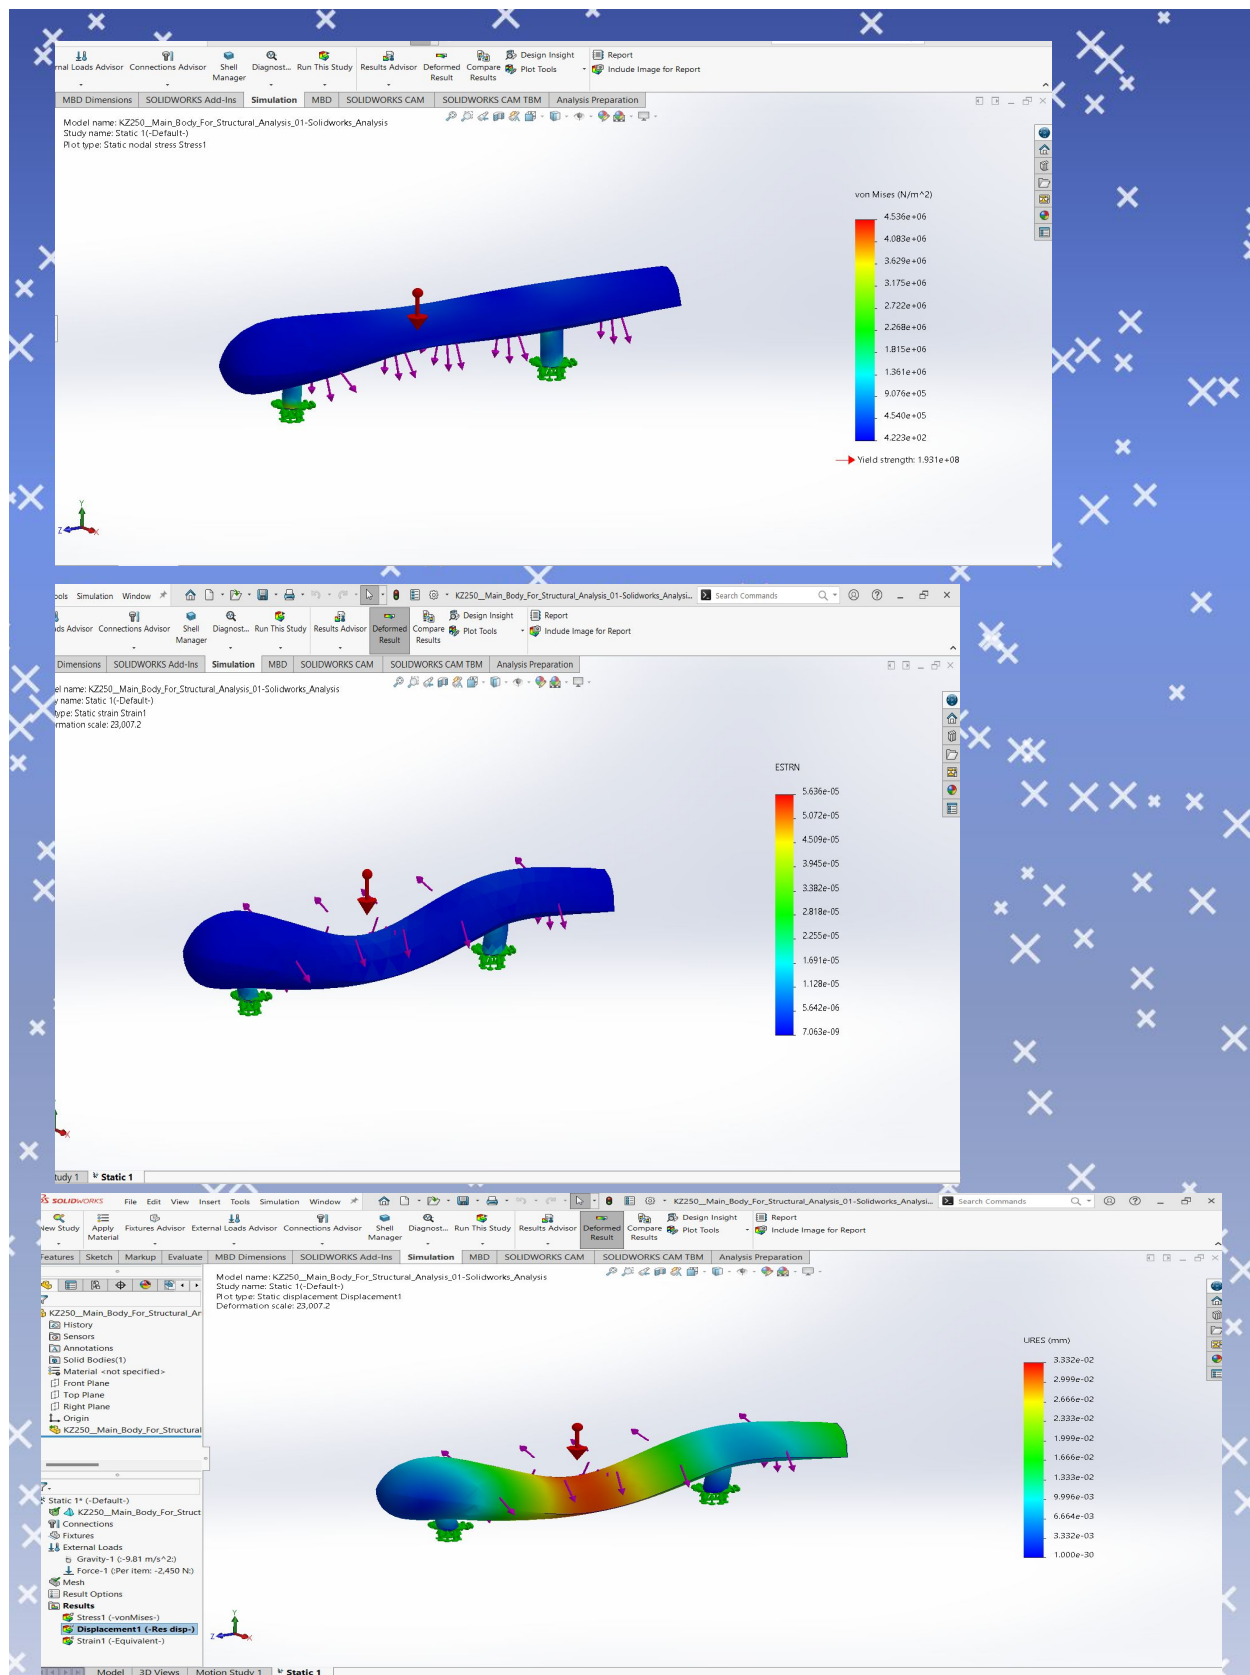

Materials

- Aluminium-Aerospace Grade
- Carbon Fiber Composites
- Titanium

STATIC ANALYSIS AND STRAIN DISTRIBUTION
(FUSELAGE)

KUZEY.WORKS

GENERATING PRESSURE PLOT & FLUID FLOW PLOT w/ SOLIDWORKS FLOW

CONCLUSION: IN ORDER TO IMPROVE THIS DRONE, IMPROVEMENTS ARE NEEDED IN THE FUSELAGE DESIGN AND TAIL END DESIGN.

KUZEY.WORKS

Creating Basic 2D drawings

Using Drafting Workbench

Creating 10+
Individual Parts
according to 2D Plans

Creating Assembly using bottom up
Approach using Assembly
Workbench

KUZEV

AUTODESK AUTOCAD

Developed detailed structural CAD drawings for a multi-story concrete structure as part of a term project. Included 1:100 section view of one of the houses, and 1:5 3D and 2D detail drawings of a shelf-angle detail holding the bricks together. AutoCAD 2D & 3D, CISC Handbook, based off architectural floor plan

RESUME HERE

KUZEY.WORKS

The background of the entire image is a vertical gradient transitioning from a deep blue at the top to a light purple at the bottom. Scattered across this gradient are numerous white 'x' marks of varying sizes, creating a starry or pixelated effect.
